

Subject Index

- AChE 53, 285
- Acid base status 139, 323
- Alkylating agents 1, 37
- Alveolar oedema 79
- Antidepressants, tricyclic 43
- Aristolochic acid 107
- Arsenite 65
- Autoradiography, whole body 65, 229

- Balkan endemic nephropathy 313
- Benzene, inhalation of 295
- Benzo(a)pyrene metabolism 121, 255
- Bone cement 157
- Bone marrow progenitor cells 37, 295
- Brain subcellular fractions 285

- Cadmium 303
- Calcium 175
- Camphor 101
- Carbon tetrachloride determination in blood and liver 91
- Carcinogenicity 27, 107
- Cardiotoxicity (Digoxin) 273
- CFU-C 37, 295
- Choline acetyltransferase 285
- Chromium 229
- Chrysene 255
- Cobalt-Cyanide complex 131
- Cobra venom 167
- Combined treatment with Cd and X-rays 303
- Cyanide 131, 247, 323
- Cytochrome P-450 53
- Cytotoxicity of cobra venom 167

- 1,2-Dibromoethane 27
- Digoxin, toxicology of 273
- 4-Dimethylaminophenol (DMAP), prior treatment with 247
- Dimethylparatoluidine 157
- Distribution and excretion 65, 131, 149
- DNA alkylation 1

- Electrocardiogram (ECG) 43, 139
- Embryonic cells in vitro 229
- Embryos in vitro 303
- Embryotoxicity 1, 229, 303
- Epichlorohydrin 37
- Erythrocyte colony forming cells (E-CFC) 37
- Ethylhexylphthalate, di- and mono 149
- Ethylmethane sulfonate 1
- Exposure chambers 295

- Fluoride 303

- Gas chromatography, head space 91
- x-Glutamyltranspeptidase (GGT) 27
- Glutathione determination 53

- Hemoperfusion 101
- Histology 53, 65, 79, 107, 167, 273
- Hypoglycaemia 139

- Intrabronchial instillation 221
- Iron content (plasma and liver) 323
- Isolated mitochondria and microsomes 53, 65

- Laboratory animals (normal rats and mice not mentioned)
 - Dogs 247, 273
 - Guinea pigs 197
 - Monkeys 65
 - Rabbits 323
- LD₅₀, "approximate" 189
- LD₅₀ versus acute toxicity 183
- Lung damage 79, 221
- Lung, ultrastructure of 79
- Lymphoma cells, mouse 167

- Maprotiline 43
- Metabolic activation 255
- Metabolites 101, 121, 255
- Methemoglobin 247, 323
- Methylmercury 175, 285
- Methylmethacrylate-bone cement 157
- Micronuclei in polychromatic erythrocytes 295
- Microsomes, liver 53, 255
- Monoamine oxidase 285
- Mycotoxins 313

- Nephrotoxicity 53, 273, 313
- Neurotoxicity (methylmercury) 285
- Nitroreductase 53
- N-nitrosodiethylamine 27

- Ochratoxin A 313
- Organophosphates 79, 221
- Osmolarity, plasma 139

- Pentachloronitrobenzene 329
- Peroxidation 53
- Phenobarbital in the drinking water 27, 221
- Phospholipase, cobra venom 167
- Phosphorothioate esters 221
- Phthalic acid esters 149
- Plasma protein binding 101
- Plasticizers 149
- Pneumocytes, type I and II 79

Poisoning, human (Camphor) 101
Polycyclic aromatic hydrocarbons 255

Quinidine 43

Radicals 53

Scopolamine 37

SKF 525 A 221

Sodium nitroprusside 323

Strychnine, toxicity of 267

Subcellular fractionation 65, 285

Sulfhydryl group inhibitors 175

Sympathetic ganglia 175

TCDD 121

Teratogenicity 1, 229, 303

Testis, isolated perfused 121

Thiocyanate 323

T-lymphocytes, PHA-stimulated 37

Toxicity, acute 183, 189, 197, 221, 267, 329

Toxicity, chronic 107

Toxicity, sub-acute 273

Trialkylphosphorothioates 79

Trinitrotoluene (TNT) 53

Tris-buffer 139

Tyrosine hydroxylase 285

Valepotriates 37

X-rays 303
